The Next Valley Flyers Club Meeting, is Tuesday, October 24th at Encino Community Center

ft wins. It will give everyone an idea of 400 feet for different sized airplanes.

Board Member Letters

President's Message

By GEORGE FINCH,
President

It was a beautiful day at the Basin, "like summer but not hot". Eric was chasing the helicopters and their pilots from the grass with his monster truck, the electric planes and gliders were over flying the taxiways, and all was at peace with the world. Maybe the long promised signs will make a difference (not with Eric as that is too much to hope for). Jason Pakfar has promised me that the signs will be delivered before you read this newsletter. Installation has been promised by the Parks and Recs. quickly, but that is too much to dream about. At least, the signs are likely to be up by the Christmas Party.

Nominations to 2007 Officers will be opened at the October General Meeting so be sure to be there or you are likely to be involved somehow. The terms of half the Board are up. So far Bob Wiikari (secretary) and Mike Lipsey (treasurer) have agreed to run for re-election. I am not running for President, even though I have a year left on my Board term. Stephen Fine, Chuck Gould and Bob Tarlau's two year terms are up and all have expressed interest in an additional term. Dave Hendrex has indicated he will resign as Event Director so he needs to be replaced.

Bob Smith has a big BBQ and Fun Fly planned for Sunday the 29th of October. Bring a side dish and eat the Valley Flyers' meat. Side dishes should be coordinated with Bob unless you want to eat a lot of different flavors of Jello salad. We hope to include an altitude derby. Mike Lipsey has an altitude device to put in your plane. Pilot who can fly closest to 400 ft without going over 400

Saturday the 11th of November, Jason is planning a night fly from 4 to 11 PM. Bring a warm coat. The previous night flies have proven that planes can be flown with lighting like a Christmas tree down to a couple of light bracelets from the 99¢ Store. Even if you can't tape some diodes on your plane, come on out and see the fun. Jason is also planning a non-scheduled Jet Fly November 26th to help pay for the signs which inflated in cost almost \$2000 in the 7 years it has taken to get them up.

The Pack Rat Team that set FAI world distance records has now died (at least two of us, I know of) or moved across country (Ron Clem) so I am looking for some pilots, drivers, and convertible owners that want to join a new distance Team. The first attempt will be to break the out and back seaplane record (only 71 Km) and then the straight line distance seaplane distance (191 miles). Requires some trips to Lake Ellsinore and then a trip to Davis Willow Airfield up near Sacramento. The straight line flight will be from Davis Willow to Lost Hills along Highway 5. I have the Kadet Senior I used to set the out and back record and it has plenty of range to break the current out and back record, but plan to use a SeaMaster with a new wing in Tony DeLeo's computer for the straight line distance try. I have two heavy SeaMaster fuselages built for practice and a light one to build. Currently, there are four candidate engines, an Irvine .40 diesel, a Magnum .52 four stroke diesel, an OS .52 Surpass ignition, and an OS .60 ignition (like Maynard Hill's).

--George

Valley Flyers Meetings Minutes

General Meeting Minutes

9/26/2006

By BOB WIIKARI,
Secretary

Meeting was brought to order by George Finch at: 7:30 PM.

Items discussed:

- There is a Pylon race at the basin on Sep 30th to Oct 1st. This race is hosted by the Whittier club. If you can help out, please come out and enjoy a day of racing.
- The Giant Scale Squadron is hosting a bus trip on November 11th to Palmdale to visit a aviation museum that has a B17 Bomber that you can board and walk around in.
- Don Goeschl visited our meeting tonight to talk about holding a Scale Masters Qualifying meet at the field. This would be a 3 day event and the Valley Flyers would sponsor this event.
- David Tarlau put on a presentation with some of the new products on the market. He brought in the new JR XP7202 synthesized radio that comes with a synthesized receiver and 4 digital servos for about \$330.00. David works at Smith Bros Hobby on Reseda Blvd. Thanks David, nice presentation.
- The Valley Flyers Fun Fly/Barbeque is coming and we are in need of people that can help with cooking, please see Bob Smith if you can help out.
- Bob Smith brought in his latest project which is a Giant Super Sportster ARF. It is powered by a Saito 180 and weighs 12 1/2 pounds.
- Barry Leavengood brought in his quarter 40 pylon racer that goes 190mph. If you have never seen these fly, come out to the basin and see for yourself.
- Meeting was adjourned by George Finch at: 9:00 PM.

Video Vic Sez:

Don't put off getting your ticket to the Holiday Party.

December 2 will be here in no time!

(See Page 7)

Board Meeting Minutes

10/3/06

Present at meeting were: Bob Wiikari, Chuck Gould, George Finch, Jason Pakfar, Mike Lipsey, Chuck Thompson, Stephen Fine, Don Lloyd, Fred Abajo, Dave Hendrex, Dave Sweaney and Guest: Don Goeschl.

Absent were: Eric Pacheco, Bob Tarlau and David Tarlau. Meeting was called to order by George Finch at: 7:40 PM.

Items discussed:

- Don Goeschl was present at this board meeting to answer any questions that may rise regarding the proposed Scale Masters Qualifier Event.
- Budget, shirts, trophies, date etc were discussed.
- Don Goeschl mentioned that there are numerous major sponsors committed to this event to provide products for raffles etc.
- Don will have a rough draft of funds required to support this event by the next board meeting (which is November).
- A motion was made to have the Scale Masters Qualifier, the board voted unanimously in favor of it.
- Jason Pakfar reported that he may need to move next years March Jet Event either forward or backward one week, He will let the board know.
- Jason is planning on having a one day jet event on November 26th of this year.
- Jason reported that the signs that we have had "in the works" are in the process of being made. He had to enlarge some of the signs due to font size issues. The price for making these signs will be about \$5000.00. It has been decided that the club will need to pay \$1500.00 and the Valley Flyers Foundation will pay for the rest.
- Mike Lipsey provided Jason a check for \$1500.00 for the signs.
- The positions on the board that are open for next year are, Event coordinator, Treasurer, President, Hospitality Chairman and possibly more.
- Mike Lipsey provided the board with a total on field expenses this year of \$3300.00 ("so far").
- Willie Gardner provided the board with a letter requesting gratuity for services provided for field improvements. It was decided that Mike Lipsey will talk with Willie about this.
- Meeting was adjourned by George Finch at: 9:30PM.

Checking	\$ 5700.86

Revolutions

By BOB TARLAU,
Senor Contributing Writer and Hospitality

REVOLUTIONS briefly covers some of the many developments involving unmanned aircraft – small and large, planes and helicopters, military, corporate, private and hobby. Radio controlled aircraft show up a lot on the wires, on websites and in newspapers. I've got an eye out for the best of them. Contributions are welcome – and so is feedback. E-mail is R_C_News@yahoo.com

R/C Planes Being Used to Track Hurricanes

Hurricane researchers have a new tool. It's a remote controlled plane that can fly where manned planes can't go. The very small, unmanned aircraft could make a big difference in forecasting the intensity of hurricanes.

This high-tech R/C plane – called the Aerosonde – is Australian-made and can be controlled from the National Hurricane Center. Its mission, if tests prove positive, is to provide data that could solve the mystery of why hurricanes suddenly increase in intensity. It's a simple concept: fly into the storm and stay there where warm water and wind interact.

Joe Cione, a NOAA scientist, says: "We'll fly as low as 500 feet and this is a critical region because this is where the energy from the ocean is getting transferred to the atmosphere right above it and this is a critical region for us to understand so we can better forecast intensity."

Five of these aircraft are stationed at a naval air facility near Key West, where testing is underway by NASA, NOAA, and the manufacturer.

Price per plane: about \$45,000. And how does it fly in a hurricane? Quite nicely, says Peter Bale of Aerosonde Corp. who adds: "We have a very strong super structure. It's a Kevlar carbon fiber construction which gives us the rigidity and strength we need for these penetrations."

The Battle of Britain – 60 Years On

From England – the Yorkshire Post reports R/C planes were part of a salute to the RAF's "finest hour" – the decisive Second World War victory in the Battle of Britain.

Members of the British Model Flying Association were at Castle Howard, near Malton, North Yorkshire, to fly models of some of the aircraft which played a decisive role in defending the UK during the Second World War. The scale planes included Hawker Hurricanes and Supermarine Spitfires.

This year marks the 60th anniversary of the Battle of Britain.

Husband and Wife Team Sell Photos Taken by R/C Chopper

From Northern Colorado, the website Coloradoan.com tells the story of a husband-wife team using an R/C chopper to create an aerial photo business.

Tim Ryan of Windsor, Colorado, is a full-scale pilot who has done the more traditional kind of aerial photo work. He's also been an R/C pilot for 20 years and now has a 5-foot-long, 20-pound R/C chopper, with a 7.2 megapixel camera

Vantage Point Aerial Photography LLC takes aerial photos of residential estates, commercial buildings and development sites, along with shots of outdoor events, races, crop analysis, and even tower inspection.

The mini-helicopter photo shoots require two people. As Ray concentrates on maneuvering the helicopter, his wife, Lindsey, is the photographer. The camera view is microwaved to the ground. Ray says he flies within AMA guidelines.

One of his customers – who runs a real estate services outfit – says Vantage Point Aerial has shoot several of his large properties for sale, such as an old movie theater and that Ray and Lindsay offer very fast turnaround.

Ray says: "She loves photography, and I love flying. We put them together, and there you go."

"Flying With the Birds"

Now to Sudbury, Massachusetts, where The Milford Daily News covered a hand-launch glider contest and quotes the CD, Mark Drela, an aerodynamics professor at MIT as saying: "You throw the thing and keep it up in the air. It's kind of a thrill." Drela says he enjoys sending up a glider when he sees hawks circling. "It's kind of fun, flying with the birds."

GREAT PLANES GIANT SUPER SPORTSTER - THE WEIGH IN!

BY BOB SMITH
Special to The Valley Flyer

Well Jay Replogle helped me weigh and balance the beast at the September meeting, using my 50lb postal scale. With previously added nose weight it came in at 12.5 pounds! It was nose heavy at that. I've removed 4 ounces leaving around 12 ounces of weight. AT 12.25 pounds and a Saito 180 for power I should have a lively performing aircraft. Stay tuned for the test flight notes.

SPORTSMAN AVIATION

VICTA Airtourer *Almost Ready to Fly!*

Designed and tested by R/C enthusiasts on 3 continents, the Airtourer is a great flying, great looking, unique model that is easy to build and fly for the typical pilot. Go ahead and wring it out! It will perform!

Will be in stock by November 20!

MODEL SPECIFICATIONS:
 Wingspan 67.5in
 Wing Area..... 800in²
 Length overall..... 55.8in
 Weight..... 10lbs
 Wing Load..... 28 oz/ft²
 Functions..... R/E/A/T
 Engine Size..... .91 2-stroke to 1.20 4-Stroke

No. 127529

List \$435.00

Yours to fly for only 319⁹⁹

The first Australian light aircraft to receive type approval, the Airtourer went into production in 1962, was produced in a handful of engine variations, and continues in limited production in 2006 with over 200 flown to date. This 21% scale Sportsman Aviation ARF model, designed by Australian aerobatic champion Chris White, is not only a unique-looking airplane but a capable aerobatic performer and a superb model.

Scale model designer and Australian aerobatic champion Chris White poses with his Airtourer next to a Victa Super Airtourer with a 150hp Lycoming O-320 powerplant.
